Summary

Results-driven **Odoo Developer** with **2.5 years of experience** specializing in the customization, enhancement, migration, and deployment of Odoo ERP systems (versions 13 through 19). Proven expertise in writing custom modules, executing complex version migrations (v13/v14 to v17/v18, and v15 to v17/v18), refactoring deprecated code, and building integrations with external APIs. Proficient in **Python, XML, PostgreSQL, and JavaScript (OWL)**. Experienced in designing REST APIs for mobile applications, configuring secure access controls, record rules, and automated workflows tailored to multi-company environments.

Technical Skills

Odoo ERP	Customization & Migration, Odoo v15–v19, XML Inheritances, QWeb PDF Reports, OWL JS Framework, Web Controllers, Scheduled Crons, Record Rules & Access Rights
Languages	Python, PostgreSQL, JavaScript, XML, PHP, HTML5, CSS3/SCSS
Tools	Git, Linux/Ubuntu, REST/SOAP APIs, JSON-RPC, XML-RPC
Integrations	Shopify, Shiprocket, Razorpay, Alankit E-Invoice, E-Way Bill, Meta WhatsApp, Eden AI, Mindee OCR
Domains	Inventory, Sales, CRM, Accounting, GST, HR, Payroll, POS, E-Commerce, Manufacturing, Multi-Company

Experience

Odoo Developer at Reliution	Jan 2024 – Present Rajkot, Gujarat, India
- Developed custom modules to extend Odoo functional workflows, mapping client requirements to scalable technical solutions. - Guided database and module upgrades, executing multi-version migrations (including Odoo v13 to v17, v14 to v17, and v15 to v18) while maintaining schema consistency. - Designed and built RESTful web services/APIs within Odoo to integrate with external e-commerce systems, shipping engines, and mobile applications. - Customized core Accounting features (reconciliations, tax reports, P&L adjustments) and POS receipt/KOT printing behaviors. - Optimized performance by refactoring compute methods, removing unused modules, and cleaning database inconsistencies using Python/SQL. - Configured secure user group roles, multi-company access records, and automated schedulers.	
Web Development Intern at Oasis Infobyte	Jan 2023 – Feb 2023 Online
Built responsive web layouts and user interfaces using HTML, CSS, JavaScript, and Bootstrap.	

Projects & ERP Implementations

Retail Business – Dhoop & Agarbatti (Incense) Manufacturing	Odoo v15 → v18 · ERP Implementation
- Conducted functional analysis and end-to-end development across Sales, Purchase, Inventory, Accounting, POS, Manufacturing, and Field Service modules. - Built a custom Employee Map View with GPS tracking, POS loyalty/OTP verification, and automated inter-company return order workflows. - Led the full migration from Odoo v15 → v18, resolving JavaScript/OWL compatibility issues and tuning performance. - Integrated Alankit E-Invoicing API with JSON payload preparation and error handling, and connected Shopify for order/stock synchronization. - Resolved dropshipping, backorder, scheduled-action, and financial report (P&L, Balance Sheet) discrepancies.	

Wholesale Business – Heavy Machinery & Industrial Engines

Odoo v18 → v19 · ERP Enhancement & Migration

- Enhanced HR, Accounting, CRM, and Documents modules; developed a custom **Daily Call Report (DCR)** module linked to CRM Leads/Opportunities.
- Built a dynamic **Incentive Management engine** (slab-based logic) tied to payroll, with salary rules for Basic, HRA, and Allowances.
- Automated recruitment workflows and survey integrations; configured Record Rules and multi-company access control.
- Migrated and stabilized custom modules (including Invoice Manual Payment) from v18 → v19; performed data integrity cleanup.
- Configured **Tally–Odoo connectors** for accounting data sync.

Wholesale Trading Business – General Products

Odoo v15 → v17 · Database Migration & Optimization

- Led database migration from v15 → v17, resolving relational mapping errors, constraint violations, and sequence mismatches.
- Optimized business logic using compute/inverse methods for serial/lot tracking and discount calculations across Inventory and Manufacturing workflows.
- Designed custom **PDF/QWeb reports** (invoices, labels, catalogs) and implemented advanced access control.
- Added discount logic, estimates, job-work configurations, invoice/delivery statuses, and custom barcode labels.
- Fixed invoice-payment reconciliation, serial number tracking, and POS data binding post-migration.

Multi-Industry Custom Module & Compliance Development

Odoo v15 – v19 · E-Invoicing & Integration

- Developed government-compliant **E-Invoicing and E-Way Bill modules** (Alankit/OCA) with JSON payload generation, API authentication, and QR code generation.
- Integrated **AI-based document parsers** (Eden AI, Mindee OCR) for automated invoice data extraction & validation.
- Maintained **Shopify order synchronization** and fulfillment tracking with real-time stock and order status updates.
- Built **Invoice Double Approval** workflows and optimized Website/eCommerce Shop Category Grid and Product Matrix views.

Footwear Retail Business – ERP Migration & E-Commerce

Odoo v14 → v18 · Migration

- Executed full-scale migration of Inventory, Sales, and POS systems, including database sanitization and legacy data mapping.
- Re-engineered **GST/Tax calculation engines** for dynamic pricing; customized POS receipt layouts with barcode/QR support.
- Integrated **Meta WhatsApp API** for automated POS receipt delivery to customers.
- Integrated **Shiprocket API** for real-time logistics tracking and automated shipping label generation.
- Resolved variant mapping, duplicate data entries, and inventory discrepancies using Python and SQL scripts.

Trading & Distribution Business – Multi-Module Migration

Odoo v13 → v18 · Migration

- Handled full-stack migration across Sales, Purchase, HR, and Accounting modules, debugging upgrade failures and deprecated method errors.
- Implemented UI/UX refinements including smart buttons and traceability views for serial/lot tracking.
- Configured **role-based access control** and multi-company record restrictions post-migration.

Restaurant & Café Business – POS Operations

Odoo v17 · POS & Kitchen Management

- Optimized POS restaurant workflows: **Kitchen Order Ticket (KOT)** printing, combo product management, and sub-item indentation on receipts.
- Developed custom **JavaScript/OWL frontend enhancements** for kitchen visibility and parent-child receipt mapping.
- Integrated third-party APIs for multi-company inventory transfers and dynamic menu synchronization.
- Designed JS patches and model extensions for POS category color-coding.

Retail & Trading Business – Financial & POS Process Refinement

Odoo v18 · Finance & Reporting

- Enhanced POS and Purchase modules with custom sequencing logic and improved order-line visibility.
- Conducted financial analysis to resolve discrepancies in **Profit & Loss reports**, balance sheets, and bank/petty cash reconciliations.
- Customized POS order-line and receipt sequencing using frontend JavaScript and backend configurations.

Pharmacy & Pharmaceutical Business – Compliance & Traceability

Odoo v15 · Regulatory Compliance

- Built **SecurPharm integration** and DM (Data Matrix) code verification logic to support pharmaceutical regulatory compliance.
- Added lot/serial/expiry traceability fields and developed API-based product validation flows.
- Implemented batch-level tracking and automated compliance alerts for expired or near-expiry stock.

Mining & Minerals Business – HR & CRM Configuration

Odoo · Payroll & CRM

- Configured **payroll salary structures and rules** tailored to industry-specific statutory requirements.
- Analyzed and optimized CRM lead generation workflows for improved pipeline visibility.
- Enhanced **API log tracking** for the Alankit E-Invoicing integration module for audit and debugging.

Manufacturing & Trading Business – Regulatory Compliance

Odoo · E-Invoicing & E-Way Bill

- Resolved complex **address-mapping issues** in JSON payloads for E-Invoice and E-Way Bill API submissions.
- Customized report structures for GST compliance and audit-ready output formats.
- Automated **authentication token refresh** via scheduled actions to ensure uninterrupted production stability.

Hospitality Business – Hotel & Guest Services

Odoo · VoIP & Purchase Automation

- Customized **VoIP softphone system** with a "Favourite Contacts" feature combining Python backend logic and JavaScript frontend integration.
- Fixed inheritance and UI binding issues in OWL components for VoIP module extensions.
- Automated **Purchase Order email notifications** with dynamic CC recipients and conditional trigger logic.

Education

Bachelor of Engineering – Computer Engineering

Marwadi Institute of Engineering & Technology (GTU)

2020 – 2024

CGPA: 7.98 / 10
