PROFESSIONAL SUMMARY

Results-driven Odoo ERP Developer with 2+ years of experience designing, developing, customizing, and migrating enterprise-level Odoo applications across Point of Sale, Accounting, Sales, CRM, Inventory, Manufacturing, HR, Website, Documents, and Field Service modules. Skilled in Python, the Odoo ORM, JavaScript, OWL, XML, and QWeb, with hands-on expertise in REST API integrations, multi-version migrations (Odoo 13-19), PostgreSQL optimization, and business workflow automation. Delivered government compliance modules, payment workflows, inventory traceability systems, payroll customization, financial reconciliation tools, and third-party integrations for clients across retail, pharmaceutical, manufacturing, trading, and hospitality industries.

TECHNICAL SKILLS

ERP Framework: Odoo 13, 14, 15, 16, 17, 18, 19

Programming Languages: Python, JavaScript (ES6), SQL, XML

Frontend Technologies: OWL Framework, QWeb, HTML5, CSS3, SCSS, Bootstrap

Database: PostgreSQL, SQL Query Optimization

APIs & Integrations: REST APIs, Meta WhatsApp API, Shopify, Tally ERP, Alankit E-Invoicing, E-Way Bill APIs, Eden AI, Mindee OCR, Shiprocket

Development Tools: Git, GitHub, VS Code, PyCharm, Postman

Functional Modules: Sales, CRM, Point of Sale, Accounting & Finance, Inventory, Manufacturing, HR & Payroll, Website/eCommerce, Documents, Field Service, VoIP

PROFESSIONAL EXPERIENCE

Odoo ERP Developer

July 2024 - Present

[Company Name] - Odoo Implementation & Consulting

Delivered end-to-end Odoo ERP implementations, customizations, and version migrations for clients across retail, pharmaceutical, manufacturing, trading, and hospitality industries, working across the full stack (Python/Odoo ORM, JavaScript/OWL, QWeb/XML, PostgreSQL) and managing upgrades spanning Odoo 13 through Odoo 19.

Key Industry Projects & Contributions

Retail Business - Dhoop & Agarbatti (Incense) Manufacturing (Odoo v15 to v18, ERP Implementation)

- Conducted functional analysis and end-to-end development across Sales, Purchase, Inventory, Accounting, POS, Manufacturing, and Field Service modules.
- Built a custom Employee Map View with GPS tracking, POS loyalty/OTP verification, and automated inter-company return order workflows.
- Led the full migration from Odoo v15 to v18, resolving JavaScript/OWL compatibility issues and tuning performance; integrated the Alankit E-Invoicing API and Shopify connectors.

Wholesale Business - Heavy Machinery & Industrial Engines (Odoo v18 to v19, ERP Enhancement & Migration)

- Enhanced HR, Accounting, CRM, and Documents modules; developed a custom Daily Call Report (DCR) module linked to CRM Leads/Opportunities and a dynamic Incentive Management engine tied to payroll.
- Automated recruitment workflows and survey integrations, and configured Record Rules and access control for multi-company operations.
- Migrated and stabilized custom modules (including Invoice Manual Payment) from v18 to v19, performed data integrity cleanup, and configured Tally-Odoo connectors.

Wholesale Trading Business - General Products (Odoo v15 to v17, Database Migration & Optimization)

- Led database migration from v15 to v17, resolving relational mapping errors, constraint violations, and sequence mismatches.
- Optimized business logic using compute/inverse methods for serial/lot tracking and discount calculations across Inventory and Manufacturing workflows.
- Designed custom PDF/QWeb reports (invoices, labels, catalogs) and implemented advanced access control.

Multi-Industry Custom Module & Compliance Development (Odoo v15 to v19)

- Developed government-compliant E-Invoicing and E-Way Bill modules (Alankit/OCA) with JSON payload generation, API authentication, and QR code generation.

- Integrated AI-based document parsers (Eden AI, Mindee OCR) and maintained Shopify order synchronization and fulfillment tracking.
- Built Invoice Double Approval workflows and optimized Website/eCommerce Shop Category Grid and Product Matrix views.

Footwear Retail Business *(Odoo v14 to v18, ERP Migration)*

- Executed full-scale migration of Inventory, Sales, and POS systems, including database sanitization and legacy data mapping.
- Re-engineered GST/Tax calculation engines for dynamic pricing and customized POS receipt layouts with barcode/QR support.
- Integrated the Meta WhatsApp API for automated POS receipt delivery and the Shiprocket API for real-time logistics tracking.

Trading & Distribution Business *(Odoo 13 to Odoo 18, Multi-Module Migration)*

- Handled full-stack migration across Sales, Purchase, HR, and Accounting modules, debugging upgrade failures and deprecated method errors.
- Implemented UI/UX refinements including smart buttons and traceability views, and configured role-based access control.

Restaurant & Cafe Business *(Odoo v17, POS Operations)*

- Optimized POS restaurant workflows, including Kitchen Order Ticket (KOT) printing and combo product management.
- Developed custom JavaScript/OWL frontend enhancements for kitchen visibility and integrated APIs for multi-company inventory transfers.

Retail & Trading Business *(Odoo v18, Financial & POS Process Refinement)*

- Enhanced POS and Purchase modules with custom sequencing logic and improved visibility and reporting.
- Conducted financial analysis to resolve discrepancies in Profit & Loss reports, balance sheets, and bank/petty cash reconciliations.

Pharmacy & Pharmaceutical Business *(Internal, Odoo v15, Compliance & Traceability)*

- Built SecurPharm integration and DM code verification logic to support pharmaceutical regulatory compliance.
- Added lot/serial/expiry traceability fields and developed API-based product validation flows.

Mining & Minerals Business *(HR & CRM Configuration)*

- Configured payroll salary structures and rules, and analyzed CRM lead generation workflows.
- Enhanced API log tracking for the Alankit E-Invoicing integration module.

Manufacturing & Trading Business *(Regulatory Compliance - E-Invoicing & E-Way Bill)*

- Resolved complex address-mapping issues in JSON payloads and customized report structures for compliance.
- Automated authentication token refresh via scheduled actions to ensure production stability.

Hospitality Business - Hotel & Guest Services *(VoIP & Purchase Automation)*

- Customized VoIP softphone systems and automated Purchase Order email notifications.
- Built a Favorite Contacts feature combining Python backend logic with JavaScript frontend integration, fixing inheritance and UI binding issues.
